

PORTABLE INTERPRETATION KIT

Provided by

Use Cases

Our portable interpretation kits are a lightweight, cost effective solution. They are perfect for simple, small-scale requirements. Some use cases include courtrooms, meetings, outdoor scenarios, among others. They operate on 2.4GHz radio frequency meaning they can be used anywhere, licence free.

Our Standard Portable Interpretation Kit

Our standard kit comes with:

- Transmitter - this plugs into the microphone and transmits the audio wirelessly over 2.4GHz radio frequency to the receivers
- Receiver - these wirelessly receive the audio from the transmitter
- Microphone- this is plugged into the receiver using a standard 3.5mm jack and worn around the neck, it is used by interpreters to give interpretation
- Earpiece - this is worn on the ear for listening to interpretation
- Eneloop Pro Batteries - to power the system (comes fully charged)
- Charging Case - to charge the units and transport them

Our Standard Whisper Interpretation Kit
